Website and Lead Capture Platform

March 2026 | Confidential | Internal Use Only

Product Name	ShaadiMe
Document Type	Product Requirements Document (PRD)
Version	0.1
Status	In Review
Date	March 2026
Prepared By	ShaadiMe Founding Team
Audience	Tech Team, Design Team, Founders

1. About ShaadiMe

ShaadiMe is a wedding planning platform built for modern Indian couples. We believe that planning a wedding should feel exciting, not exhausting. Most couples spend months coordinating with vendors, comparing quotes, and chasing follow-ups. ShaadiMe removes all of that friction.

Our vision is simple. A couple should be able to come to ShaadiMe, tell us what they want, and then show up to their wedding as a guest. Everything in between is taken care of by ShaadiMe.

We are starting with the three biggest metro markets for weddings in South India, Bengaluru, Chennai, and Hyderabad, and we will expand from there. Version 0.1 is our first step into the market. It is not about showing vendors or quotes. It is about getting to know the couples who are planning their wedding and starting that relationship on the right note.

2. Purpose of This Document

This PRD defines the full product requirements for Version 0.1 of the ShaadiMe website. It covers every section, every feature, and every screen the user will interact with. This document is the single source of truth for the tech team and design team building this version.

Version 0.1 is a lead generation platform. There are no vendor listings, no pricing, and no booking flows in this version. The goal is to get couples onto the platform, collect their planning details, and follow up with them personally to begin the planning journey.

3. Goals for Version 0.1

- Launch a polished, emotionally resonant website that introduces ShaadiMe to Indian couples.
- Capture high-quality planning leads through a personalised, multi-step intake form.
- Build brand awareness and early trust in Bengaluru, Chennai, and Hyderabad.
- Give couples a taste of what ShaadiMe stands for: convenience, personalisation, and care.
- Create an internal lead pipeline that the ShaadiMe team can act on immediately post-launch.

4. Out of Scope in Version 0.1

The following will not be built in this version. These are planned for future releases.

- Vendor listings or vendor profiles.
- Vendor quotes or pricing comparisons.
- Booking or payment flows.
- User accounts or login system.
- A visible waitlist or pre-registration label. This is intentional. The platform should feel live and ready, not like a waitlist.
- Mobile app.

5. ShaadiMe Brand Identity

Every screen, section, and interaction in Version 0.1 must align with the ShaadiMe brand. The palette is warm, celebratory, and deeply Indian. The tone is personal and confident, not corporate.

Deep Purple #4b1248 *Primary Background*	**Blush Pink** #fad6d6 *Shaadi Text Color*	**Coral Red** #ff5757 *Me Text Color*

5.1 Color Usage Rules

- Deep Purple (#4b1248) is the primary background color for the website and all brand materials.
- Blush Pink (#fad6d6) is used for the word Shaadi in the logo and for soft accent text.
- Coral Red (#ff5757) is used for the word Me in the logo and for primary call-to-action buttons and highlights.
- White and off-white (#ffffff, #fdf6f3) are used for body text on dark backgrounds and card surfaces.
- No colors outside this palette should be introduced in Version 0.1 without sign-off from the founding team.

5.2 Tone and Emotion

The website should feel warm and human. Every section should be thoughtfully designed with emotional intent. Couples are planning one of the most important days of their lives. They should feel that ShaadiMe understands that.

Use wedding elements throughout the design, flowers, rings, drapes, mandap, and celebration imagery, in a way that feels aspirational rather than generic.

6. Website Page Structure

Version 0.1 is a single-page website. All sections are on one scrollable page. The order of sections from top to bottom is as follows.

#	Section	Description
1	**Hero Section**	Full-width visual with tagline and Start Planning CTA.
2	**Wedding Themes**	Curated themes showcased with HD videos and imagery.
3	**Types of Venues**	Venue categories shown with iconic visuals, no listing or pricing.
4	**Decoration Styles**	Different decoration sets displayed as inspiration.
5	**Why ShaadiMe**	Convenience-focused value proposition section.
6	**Launch Cities**	Bengaluru, Chennai, Hyderabad shown with iconic city logos.
7	**FAQ**	Answers to common questions couples have before planning.

7. Section Specifications

7.1 Hero Section

The Hero is the first thing a visitor sees. It needs to make an immediate emotional impact and direct the couple toward the Start Planning button.

Content

- Full-width background using a high-quality HD wedding video or photograph. The visual should feel cinematic and emotionally resonant.
- ShaadiMe logo prominently placed at the top center or top left.
- A tagline placed centrally on the hero. Suggested: Come to your wedding as a guest. We will take care of everything.
- Primary call-to-action button: Start Planning. Color: Coral Red (#ff5757). Text: white. Rounded corners. Hover animation.
- The hero should evoke warmth, celebration, and confidence in ShaadiMe as a partner.

7.2 Wedding Themes

This section showcases the different types of wedding themes ShaadiMe can bring to life. It is purely inspirational in this version. No pricing or vendor information.

- Display 4 to 6 curated wedding themes. Examples: Royal, Intimate Garden, Traditional South Indian, Destination, Minimalist Modern, Fusion.
- Each theme should have a name, a short one-line description, and a beautiful HD visual or short looping video clip.
- Layout: horizontal scroll or a grid of cards.
- Subtle hover animation on each card.

7.3 Types of Venues

This section gives couples a visual sense of the venue categories ShaadiMe works with. There are no specific venues listed, no locations, and no pricing in this version.

- Display 4 to 5 venue categories. Examples: Palace and Heritage, Five Star Hotel, Farmhouse and Open Air, Banquet Hall, Beach.
- Each category: name, a one-line descriptor, and a beautiful representative photograph.
- The purpose is inspiration and aspiration, not information.

7.4 Decoration Styles

A visual showcase of different decoration styles and setups ShaadiMe can arrange. Again, no vendor names, no quotes.

- Display 4 to 6 decoration styles. Examples: Floral Extravaganza, Drape and Lights, Marigold Traditional, Minimal Luxe, Royal Baroque.
- HD images for each style. If short video walkthroughs are available, use them.
- Design this section to feel like a mood board rather than a catalogue.

7.5 Why ShaadiMe

This is the most important content section of the website. It communicates ShaadiMe's core value proposition. The focus is entirely on convenience and the promise that couples do not have to stress about anything.

Core Message

Tell us how you want your wedding. Just show up. ShaadiMe takes care of everything in between.

Value Pillars to Feature

- Complete Convenience: You plan once. We handle the rest. No follow-ups, no vendor coordination, no last-minute panic.
- Personalised to You: Whether it is an intimate ceremony of 50 or a celebration for 1000, we tailor everything to your vision.
- One Point of Contact: You have one ShaadiMe planner for everything. No juggling 15 different numbers.
- Made for Indian Weddings: We understand the rituals, the scale, the families, and the emotions that come with an Indian wedding.
- You are the Guest: Come to your own wedding without a to-do list. That is the ShaadiMe promise.

Layout

- 5 cards or feature blocks with an icon, a short heading, and one to two lines of description.
- Use the ShaadiMe brand palette. Deep purple background with coral and pink accents.

7.6 Launch Cities

ShaadiMe is launching in three cities in Version 0.1. This section acknowledges that and builds local relevance.

- Display three cities: Bengaluru, Chennai, and Hyderabad.
- Each city should be represented by its iconic landmark or a recognisable city logo or skyline illustration.
- Keep it simple and celebratory. No text beyond the city name and perhaps a short line like We are here.
- This section signals to couples in these cities that ShaadiMe is for them specifically.

7.7 FAQ Section

Address the most common questions couples have before they decide to reach out. This builds trust and reduces hesitation.

Suggested FAQ Topics

- What does ShaadiMe actually do? Is it a vendor marketplace or a planning service?
- How much does it cost to plan with ShaadiMe?
- Which cities is ShaadiMe available in right now?
- How soon should I get in touch before my wedding date?
- What if I only need help with part of the wedding and not everything?
- Will I have a dedicated planner or will multiple people be involved?
- Can I upload inspiration photos or references for my wedding vision?

Design Notes

- Accordion-style expand and collapse for each question.
- Keep answers warm and conversational, not formal or robotic.
- End the FAQ section with a soft CTA: Still have questions? Start planning and we will sort everything out.

8. Start Planning Flow

When a couple clicks Start Planning on the hero section or anywhere else on the page, they enter a multi-step personalised intake form. This form is the most important interaction in Version 0.1. It is the heart of the lead generation mechanism.

The form must feel warm, personal, and emotionally considered. Every screen should have wedding design elements. The tone should feel like a conversation, not a form.

8.1 Form Questions and Flow

Q	Field / Question	Details
1	**Your Names**	Bride's first name and Groom's first name. Two separate text fields. Required.
2	**Phone Number**	10-digit Indian mobile number. Required. This is the primary contact for ShaadiMe follow-up.
3	**Wedding Date**	Date picker. Allow approximate month or year if exact date is not fixed. Option for Not decided yet.
4	**Budget**	Dropdown with ranges. Under 5 Lakh / 5 to 15 Lakh / 15 to 30 Lakh / 30 Lakh and above / Flexible.
5	**Wedding Type**	MCQ: Arranged Marriage / Love Marriage. This personalises the communication tone ShaadiMe uses with the couple.
6	**Guest Count**	MCQ: Under 100 / 100 to 300 / 300 to 600 / 600 to 1000 / Above 1000.
7	**Planning Preference**	MCQ: I want to be involved in every detail / I want to share my vision and let ShaadiMe handle the rest / Take care of everything, I trust ShaadiMe completely.
8	**Inspiration Upload**	Optional photo upload field. Label: Share any photos or inspiration for how you want your wedding to look. Accepted formats: JPG, PNG, PDF. Multiple files allowed. Max 10 files.
9	**City**	Dropdown: Bengaluru / Chennai / Hyderabad.

8.2 Form Design Guidelines

- Each question should be on its own step or screen. Do not show all questions on one page.
- Show a progress bar or step indicator so couples know how far they are through the form.
- Use wedding-themed micro-copy on each step. For example, on the names screen: Tell us who is getting married. On the date screen: When is the big day?
- Add subtle floral or decorative design elements on each step screen consistent with the ShaadiMe brand palette.
- The form should feel like an experience, not a form.
- All fields except the inspiration photo upload are required before the couple can proceed.

8.3 Confirmation Screen

After the couple submits the form, they land on the confirmation screen. This screen is as important as any other. It is the last impression Version 0.1 leaves on the couple.

Copy (Sample)

Thank you for choosing ShaadiMe. We are going to take care of everything. Enjoy the process.

Design Notes

- Full-screen warm and celebratory design. Deep purple background with floral and light elements.
- Animate the screen gently. Confetti, flowers, or soft light burst on load.
- Show the couple's names on this screen if possible. Congratulations, [Name] and [Name].
- No next steps or links on this screen. The ShaadiMe team takes over from here.

9. Post Submission and Internal Flow

Once a couple submits the form, the following happens on the ShaadiMe side. This is not a product requirement for the website but it is documented here so the team understands the full picture.

- All form submissions are stored in a lead database accessible to the ShaadiMe planning team.
- The ShaadiMe team receives an immediate notification for each new submission with the couple details.
- A team member will reach out to the couple within 24 hours to introduce themselves and schedule a call.
- The call is used to gather more details, understand the couple's vision, and begin the actual planning process.
- The inspiration photos uploaded by the couple are reviewed by the team before the call to come prepared.

Version 0.1 is essentially a structured discovery form that feeds directly into a human-led sales and planning process. The website captures the lead. The ShaadiMe team closes it.

10. Acceptance Criteria

Version 0.1 is ready to launch when all of the following are true.

Criteria	Definition of Done
All 7 sections live	Hero, Themes, Venues, Decoration, Why ShaadiMe, Cities, FAQ all render correctly on desktop and mobile.
Start Planning CTA	Button is present on the hero and navigates to the multi-step form.
Form flow complete	All 9 steps work end to end including the photo upload on step 8.

Confirmation screen	Displays correctly after form submission with the correct copy and animation.
Lead capture working	Form submissions are stored and the team receives a notification.
Mobile responsive	All sections render correctly on 375px and 1440px screen widths.
Brand compliant	All colors, fonts, and visual elements match the ShaadiMe brand palette.
Performance	Lighthouse performance score of 80 or above on desktop.
No broken links	Every clickable element works. No 404s or dead links.

11. Suggested Build Timeline

Timeline	Task	Notes
-	**Design: Wireframes and Visual Mockups**	All 7 sections plus all form steps including confirmation screen
-	**Content and Copy Finalisation**	Section copy, FAQ answers, form micro-copy, confirmation screen text
-	**Development: All Website Sections**	Hero, Themes, Venues, Decoration, Why ShaadiMe, Cities, FAQ
-	**Development: Start Planning Form**	Full multi-step form including photo upload and confirmation screen
-	**Lead Capture Backend**	Form submission storage and team notification system
-	**QA and Responsive Testing**	Desktop and mobile testing across all sections and form steps
-	**Launch**	Deploy Version 0.1 for public access in Bengaluru, Chennai, Hyderabad

12. Open Questions

- Who is sourcing the HD wedding video and photography assets for the hero and theme sections?
- Will the city icons be illustrated custom or sourced from a design library?
- What tool or service will be used to store and notify the team of form submissions? Options include Airtable, Google Sheets, or a custom backend.
- Is there a preferred animation library for the confirmation screen celebration effect?
- Should the FAQ be hardcoded or managed through a simple CMS so the team can update it without a developer?

This document is for internal use only. Do not distribute outside the ShaadiMe team.
